

# oncoReveal™ BRCA1 & BRCA2 plus CNV Panel

The **oncoReveal™ BRCA1 & BRCA2 plus CNV Panel** is designed for the detection of exon-level copy number variation (CNV) across the entire coding region of the *BRCA1* and *BRCA2* genes. The assay is designed with shorter amplicons to allow for detection of mutations from FFPE samples, while also being compatible with intact genomic DNA from blood samples. The assay sequences the full coding region plus 10bp of flanking introns. The panel utilizes proprietary Stem-Loop Inhibition-Mediated amplification (SLIMamp®) technology, a tiled amplicon-based library prep chemistry for efficient single-tube target enrichment.

## Panel specifications\*

Enrichment chemistry	Multiplex PCR using tiled amplicons
Number of pools	1 pool
Number of genes/amplicons	2/283
Number of targets	Full coding gene sequence (CDS) with flanking intronic regions (10bp), ~16.8kb total size
Variant types	Exon level CNV, SNV, small and medium indels
Average amplicon size	155bp
Recommended DNA input range	20ng to 80ng
Sample types	DNA from tissue or blood; FFPE
Mapping rate	99.0% ± 0.3%
% on-target aligned reads	98.6% ± 0.2%
Coverage uniformity (% targets with >0.2X mean coverage)	98.0% ± 0.1%
Total assay time (from DNA to sequencer)	<8 hours
Sequencing platforms	Illumina® sequencers

\* Mapping rate, percentage of on-target aligned reads, and coverage uniformity metrics are based on internal testing performed using reference standard materials

### Simple NGS library prep workflow

Maintain control of samples and results with single-tube, tiled amplification that can be performed in-house by any NGS lab

### Sensitive and robust chemistry

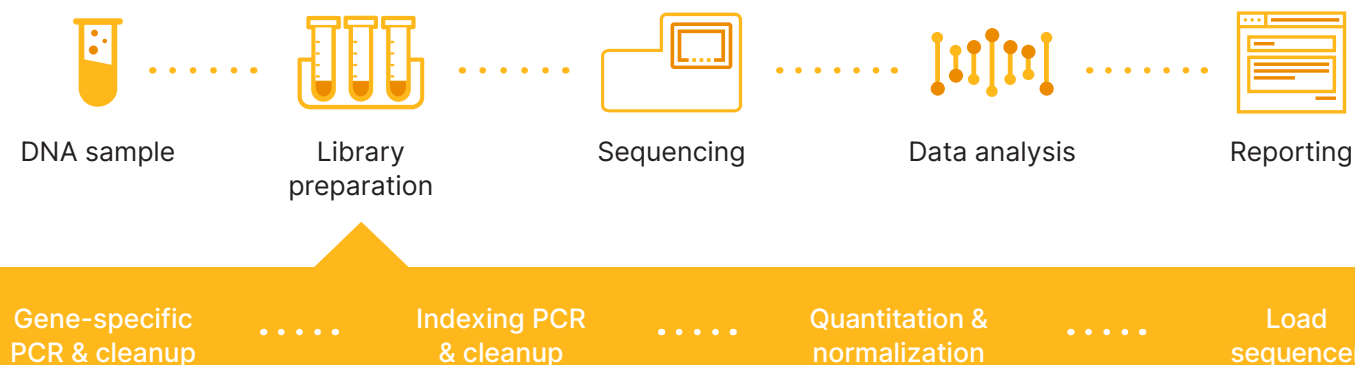

Achieve variant detection as low as 1% VAF<sup>†</sup> without UIDs<sup>‡</sup> even with limited DNA input or poor sample quality

### Reduced fully-loaded lab costs

Improve lab efficiency and reduce “no calls”, repeat testing, and difficult interpretation decisions

<sup>‡</sup> UID, unique ID; also known as unique molecular ID (UMI); <sup>†</sup> VAF, variant allele frequency  
For Research Use Only. Not for use in diagnostic procedures.

## Simple, one-day workflow

## Ordering information

Select the panel AND one of the index kit options listed below.

Panel	Part number
oncoReveal™ BRCA1 & BRCA2 plus CNV Panel (24 reactions)	HDA-BR-1003-24

Pillar Index Kit options	Reactions	Part number
Pillar Custom Index Primers Kit A	32 Combinations, 96 reactions	IDX-PI-1001-96
Pillar Custom Index Primers Kit D	96 Combinations, 192 reactions	IDX-PI-1004-192
